

Norton 360 for Mobile

 iOS

Choose to be safer online.

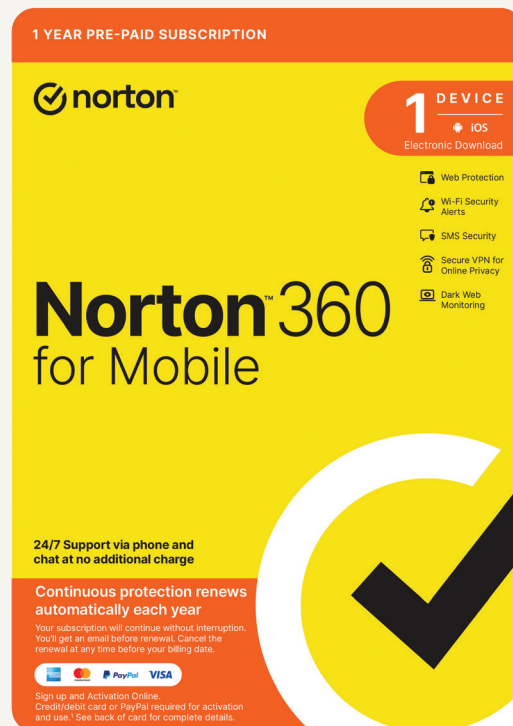

Norton 360 for Mobile provides powerful layers of protection for your mobile device against viruses, ransomware, malware, and other online threats as you bank, browse and shop online.

Your personal information has protection at home and on-the-go with bank-grade encryption from our Secure VPN. It helps block cybercriminals from accessing personal information sent and received when connecting to home and public Wi-Fi.

It also checks for the latest security patches and OS updates. And, it monitors for vulnerabilities and cyberattacks that attempt to leverage OS vulnerabilities for malicious purposes.

Two great App Advisor features help protect your Android device from apps with risky or intrusive behaviours. With Dark Web Monitoring[§], we'll scan the dark web for your information and notify you if it's found.

☒ **Opt-in to Cyber Safety™**

Powerful protection for your mobile device and online privacy – plus Dark Web Monitoring[§]

Features

Dark Web Monitoring[§]

We monitor the dark web and notify you if we find your personal information.[§]

Device Security

Real-time protection for your mobile device against ransomware, viruses, spyware, malware and other online threats.

Secure VPN

Access your favourite apps and websites when connecting to Wi-Fi at home or on-the-go with the reassurance of bank-grade encryption.

SMS Security

Helps filter spam SMS text messages that may contain phishing attacks. These attacks use links to fraudulent sites that compromise your personal information.¹

Wi-Fi Security Alerts

Get notified about Wi-Fi networks under attack by cybercriminals who might eavesdrop on your Wi-Fi connection to steal or glean personal information or infect your device with malware.

Web Protection

Helps detect and safeguard you from navigating to fraudulent (phishing) and malicious websites when using your preferred browser or opening links from apps, text messages, and emails.

App Advisor²

Scans new and existing apps to help protect against mobile threats like viruses, malware, spyware, ransomware, adware and privacy leaks. Android only.

System Requirements

See <https://www.norton.com/sysreq> for the most up-to-date system requirements.

[§] Dark Web Monitoring defaults to monitor your email address only and begins immediately. Sign into your account to enter more information for monitoring.

¹ iMessage not supported.

² App Advisor feature is available on Android only.

No one can prevent all cybercrime or prevent all identity theft.
