TALKX
WFH HEADSET

**WIRELESS
WFH HEADSET**

TALK ALL DAY LONG

Whether you are jumping into Zoom meetings, Team calls, Skype, Messenger, Gaming or simply listening to music, the TalkX has got you covered with over 50 hours of playback and talk time.

If you get caught out, simply give it a quick 10 minute charge for 5 hours of juice.

SIGNATURE SOUND

With custom tuned 40mm signature drivers, the TalkX brings the crystal clear call quality and thumping low end. Featuring 2 EQ modes created by Studio Engineers to optimize the audio profile. Standard is for calls to balance the treble, mids and bass profiles. Bass boost emphasizes the bass frequencies in your music.

BOOM MICROPHONE

The TalkX has multiple microphone options, the removeable Boom mic is perfect for use in a noisy environment or when you need to make sure your voice is heard loud and clear. The TalkX automatically senses if the Boom microphone is engaged and will switch mics automatically.

MULTIPOINT

With multipoint, the TalkX is able to connect to two devices simultaneously. This means your phone and your laptop. If a call comes through on your phone, simply answer it on the TalkX. If it comes through on your computer, answer it there and then it will swap to the TalkX.

Works with Windows®, Mac®, iOS and Android.

DELUXE CARRY POUCH

A folding design makes the TalkX small enough to carry with you wherever you go. The Pouch features a pocket for the boom mic and charge cable for easy stowing.
